Make Your Photo Irresistible!!

Construction of Light Body Kit

1. Please pay attention to the knob circled in red

2. Look into the lock hole, and you should see that the screw is actually showing up. Please turn the knob until the screw disappears.

3. Take out the supporting rod, and look at the round connector. Stick it into lock hold & tighten the screw.

Construction of Umbrella Unit

1. Pay attention to the little go-through hole when looking at the light body directly

2. Insert the metal rod of umbrella through the hole

3. The complete light kit with umbrella is complete.

Construction of Soft Light Box:

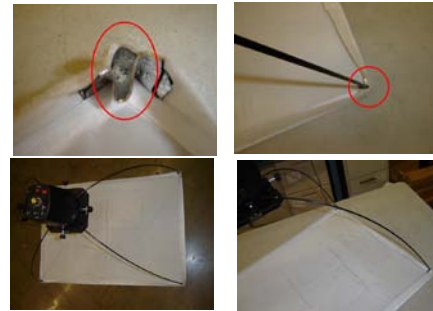

1. Please take out the stabilizing frame and put it on the light body by tightening the 4 screws as indicating via red squares in pictures.

2. Please take out the 4 metal sticks for frames of light box, and them onto the hole of stabilizing frame.

3. Please take out the front white cover, and look for the socket on each of the 4 edges. Insert the other ends of metal sticks into these sockets. Some force may be required in order to bend the metal sticks.

4. Please take out the inner white cover. Pay attention to the 4 Velcro tapes at the edge. Then, please cover the light frame as constructed in step 3. Please flip the black cover over partially and pay attention to the 4 Velcro tapes. Connect the tapes from both covers.
